

Maintenance Research Bulletin: September 2015

**NTREC New Technology Research Equipment Committee
MOR Maintenance Operations Research**

Office of Maintenance YouTube site

The Office of Maintenance has a new venue to offer information and training in an organized and helpful manner. YouTube has proven to be a useful tool to present and share videos from both within and outside of MnDOT. With the robust permission settings and analytics offered, it is ideal for use in video storage and display. The videos that are featured on the Office of Maintenance's YouTube channel are organized by topic using playlists. If you want to watch a particular video regarding Snow & Ice, simply click on the playlists button and select the Snow & Ice playlist. The playlist will automatically begin playing the first video in that selection. A large section dedicated to training will be available soon. One noticeable feature on this channel is a good mixture of both professionally shot and cell phone recorded videos. If you have suggestions or have a video that you would like to see featured, please contact Steve Blaufuss.
