

NRRA MONTHLY MEETING MINUTES

Date: 04.05.2018

Time: 12:30 PM

Attendees:

1. Bora Cetin (ISU)
2. Haluk Sinan Coban (ISU)
3. Heather Shoup (IDOT)
4. David Van Deusen (MnDOT)
5. John Siekmeier (MnDOT)
6. Robert Filipczak (MnDOT)
7. Tuncer Edil (UW)
8. Richard Larson (MnDOT)
9. Jeffrey Horsfall (WiscDOT)
10. Timothy Andersen (MnDOT)

Discussions

- More intelligent compaction and automated plate load tests will be conducted on sections 328, 428, 528, 628, and 728 where LSSB and geosynthetics are used together.
- MnDOT will let ISU know when Ingios will perform and automated plate load tests in few weeks.
- UTEP continues running laboratory resilient modulus tests and they will plan to be done by end of May.
- MnDOT has shipped the materials to ISU and UW-Madison.
- FWD tests were performed on last Monday. More tests will be performed in the week of April 16th.
- ISU would like to join the FWD testing to perform LWD and GeoGauge tests on the same locations.
- Tech transfer “State of Practice” report is decided to be around 8 pages.
- 2 separate tech transfer reports will be prepared for recycled materials (RAP and RCA) and LSSB.
- Sustainability part of the project will be discussed again later.
