

Determining Pavement Design Criteria for Recycled Aggregate Base and Large Stone Subbase

Bora Cetin

Haluk Sinan Coban

Halil Ceylan

William Likos

Tuncer Edil

Ashley Buss

Junxing Zheng

MnDOT Project TPF-5(341)

Monthly Meeting

January 9, 2020

AGENCY MEMBERS

- MnDOT
- Caltrans
- MDOT
- IDOT
- LRRB
- MoDOT
- WisDOT
- NDDOT
- Iowa DOT
- Illinois Tollway

ASSOCIATE MEMBERS

- Aggregate & Ready Mix of MN
- Asphalt Pavement Alliance (APA)
- Braun Intertec
- Infrasense
- Diamond Surface Inc.
- Flint Hills Resources
- International Grooving & Grinding Association (IGGA)
- Midstate Reclamation & Trucking
- MN Asphalt Pavement Association
- Minnesota State University - Mankato
- National Concrete Pavement Technology Center
- Roadscanners
- University of Minnesota - Duluth
- University of New Hampshire
- Mathy Construction Company
- Michigan Tech Transportation Institute (MTTI)
- University of Minnesota
- National Center for Asphalt Technology (NCAT) at Auburn University
- GSE Environmental
- Helix Steel
- Ingios Geotechnics
- WSB
- Cargill
- PITT Swanson Engineering
- University of California Pavement Research Center
- Collaborative Aggregates LLC
- American Engineering Testing, Inc.
- Center for Transportation Infrastructure Systems (CTIS)
- Asphalt Recycling & Reclaiming Association (ARRA)
- First State Tire Recycling
- BASF Corporation
- Upper Great Plains Transportation Institute at North Dakota State University
- 3M
- Pavia Systems, Inc.
- All States Materials Group
- Payne & Dolan, Inc.
- Caterpillar
- The Dow Chemical Company
- The Transtec Group
- Testquip LLC
- Harddrives, Inc.
- Husky Energy
- Asphalt Materials & Pavements Program (AMPP)
- Concrete Paving Association of MN (CPAM)
- MOBA Mobile Automation
- Geophysical Survey Systems
- Leica Geosystems
- University of St. Thomas
- Trimble

OUTLINE

- Follow-up
- Test cells & materials
- Tasks 5 & 6

FOLLOW-UP

- **Task 1** – Literature review and recommendations
- **Task 2** – Tech transfer “state of practice”
- **Task 3** – Construction monitoring and reporting
- **Task 4** – Laboratory testing
- **Task 5** – Performance monitoring and reporting
- **Task 6** – Instrumentation
- **Task 7** – Pavement design criteria
- **Task 8 & 9** – Draft/final report

Green – Completed
Red – In Progress

TASKS 5 & 6

- Falling weight deflectometer (FWD)
- Frost heave
- International roughness index (IRI)
- Rutting
- Environmental monitoring
 - Weather data
 - Temperature sensors
 - Moisture sensors
 - Frost depth
 - Number of freeze-thaw cycles
- Pavement distresses

FROST DEPTH

Laboratory and field performance of recycled aggregate base in a seasonally cold region

Tuncer B. Edil, Bora Cetin, Ali Soleimanbeigi (2017)

- Freeze-point depression
 - Temperature at which water would begin to freeze in the materials
- Complete freezing
 - Lower temperature than the freeze-point depression

Table 2 Freezing-point depressions and freezing temperatures of materials (Rosa *et al.*, 2016).

Materials	Freezing-point depression (°C)	Freezing temperature (°C)
RCA	–	–12
50% RCA~50% Aggregate	–	–12
RAP	–10	–15
Natural aggregate	–5.2	–12

FROST DEPTH

Mechanistic-based comparisons for freeze-thaw performance of stabilized unpaved roads

Cheng Li, Pavana K.R. Vennapusa, Jeramy Ashlock, David J. White (2017)

- 0°C isotherm lines

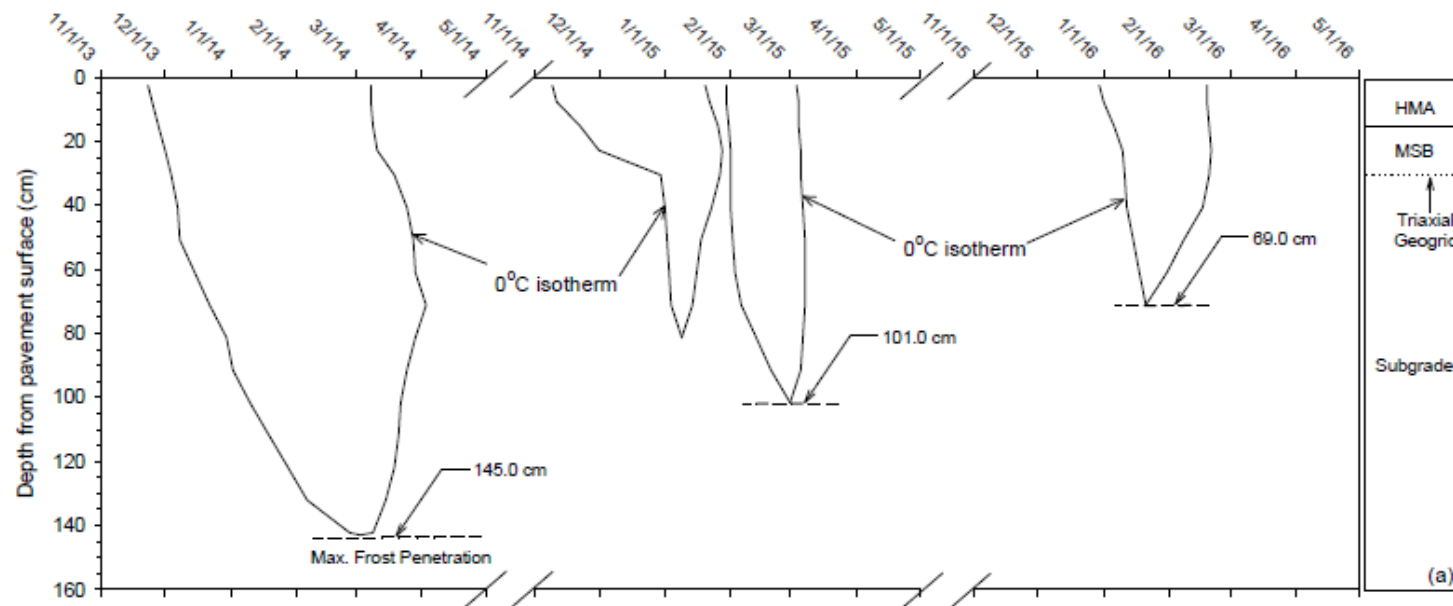

FROST DEPTH

Assessing seasonal performance, stiffness, and support conditions of pavement foundations

Yang Zhang (2016)

- 0°C isotherm lines
- $\pm 0.5^{\circ}\text{C}$ to determine the number of freeze-thaw cycles

FROST DEPTH

MnDOT Method

- 23 hours in a day is below 0°C – freezing
- More than 4 hours in a day higher than 0°C – thawing
