

Advance transportation research and innovation...

JOIN A TECHNICAL ADVISORY PANEL

RESEARCH AT MNDOT

MnDOT's Office of Research & Innovation administers state and local research projects to help solve transportation problems. Topics include: bridges and structures, environmental, maintenance operations, materials and construction, multimodal, policy and planning, and traffic and safety.

WHAT IS A TAP?

Each research project requires a Technical Advisory Panel (TAP) to provide technical assistance and monitor the rigor and value of the contract deliverables. TAP members participate in meetings, provide technical assistance and review deliverables.

HOW DO I PARTICIPATE?

Everyone is welcome to apply! Diverse perspectives and expertise helps us do better research. If joining a TAP isn't the right fit, we can find other ways to get you connected and informed on our research.

ADVANTAGES OF SERVING

1. Network with other practitioners in your area
2. Better understand MnDOT's work with universities across the country
3. Contribute to cutting-edge research
4. Explore a new area of MnDOT
5. Build your resume
