

Surface Transportation Block Grant Program

Program Overview

The Surface Transportation Block Grant Program provides flexible federal aid funding that may be used by states and local agencies for preservation, reconstruction or construction on any federally eligible highway, bridge/tunnel, pedestrian/bicycle facility, and transit capital facility.

Historically, STBG funding has been one of the largest single funding programs offered by the Federal Highway Administration with each state receiving a share. For Minnesota, these funds have traditionally been used to reconstruct or construct road and bridge projects with other modal elements (i.e. trails, transit facilities, etc.) as smaller components of the project.

The STBG federal funding for local agencies is distributed to ATP's/MPO's in the following manner:

- 50 percent of the funds are sub-allocated based on population consistent with the most recent census
- 50 percent of the funds are distributed based on the needs calculated by the MnDOT State Aid for Local Transportation Division

The MnDOT State Aid for Local Transportation Division is responsible for the administration and oversight of the local federal STBG program.

Program Eligibility and Criteria

Eligibility

Eligible local agencies that can use STBG funds for projects include: counties, cities, townships, and tribal governments. Townships and cities with a population of less than 5,000 must request the sponsorship of a county to apply for funding and implement projects. Local agencies are required to provide a 20 percent local match to STBG federal funds that they receive.

Criteria

Projects are selected through a competitive solicitation process in each of the seven Area Transportation Partnerships/Metropolitan Planning Organizations throughout greater Minnesota. Metropolitan Council, through the Transportation Advisory Board, in the seven-county metropolitan area select projects through a competitive solicitation process. Each ATP/MPO and the Metropolitan Council use their own method for ranking and selecting projects. Some of the criteria that are typically a part of the solicitations includes:

- Improved safety
- Reduced congestion
- Preserved/extended pavement life
- Connections between major points of interest

The STBG funds for local agencies may be used on functionally classified roadways that meet FHWA's requirements - the Code of Federal Regulations definition of federal aid highways means highways on the federal aid highway system (National Highway System= Interstate System, and interconnected urban and rural principal arterials and highways) and all other public roads not classified as local roads or rural minor collectors.

Funding

The table below shows the amounts programmed statewide available to local agencies.

	2021	2022	2023	2024	2025
STBG Funds Programmed	\$94.5 M	\$94.5 M	\$97.7 M	102.9 M	\$102.9 M

*Does not include BROS, NHS, NHFP, TA, HSIP, CMAQ or FLAP funding
